

# Manpreet Singh

Waterloo, ON | (416) 930-4426 | [sing2470@mylaurier.ca](mailto:sing2470@mylaurier.ca) | [linkedin.com/in/manpreet-swe](https://linkedin.com/in/manpreet-swe) | [github.com/Manpreet-Singh-Kamboj](https://github.com/Manpreet-Singh-Kamboj)

## Education

### Wilfrid Laurier University

Master of Applied Computing (Co-op)

Sep 2025 – Present

GPA: 3.9 / 4

### Chitkara University

Bachelor of Engineering (Computer Science)

Jul 2021 – Aug 2025

GPA: 3.7 / 4

## Work Experience

### CoreAI Technologies

Jun 2025 – Dec 2025

#### Software Developer

Remote

- Built health tracking dashboard with **Next.js** and **TanStack Query** for data fetching and caching, visualizing biomarker trends using **Recharts** with customizable pinning, target thresholds, and metric categorization.
- Developed Health Snapshot categorization system organizing biomarkers across blood, cardiovascular, and performance metrics with detailed information pages, simplifying health tracking workflows.
- Implemented guest PIN access feature in production Android Smart Lock app using **Kotlin** and **Seam SDK**, enabling temporary door access with NFC authentication, PIN validation, and reducing unauthorized entries.

### SalesCode.ai

Jun 2024 – Dec 2024

#### Software Engineer Intern

Gurugram, India

- Built geo-targeted advertisement banner system using **Spring Boot**, custom **Flutter** widgets, **AWS S3** for banner storage, and deployed on **AWS EC2** with auto-scaling, serving 100K+ sales reps, achieving 15% higher CTR.
- Optimized **Flutter** app performance through widget refactoring and lazy loading patterns, reducing memory footprint from **89MB** to around **62MB**, improving overall app performance.
- Collaborated with 5 engineers in **Agile** sprints to deliver 5+ production **Flutter** features, implementing **unit tests** and incorporating code review feedback reducing post-release bugs.

## Projects

### Qure | [Frontend](#) | [Backend](#)

Node.js, Express.js, React Native, PostgreSQL, Socket.IO, Redis, Docker

- Developed full-stack clinic queue management system with **Node.js/TypeScript** backend, **React Native** mobile app, and role-based access supporting patient, staff, and administrator workflows with **JWT**-based authentication.
- Engineered real-time queue system using **Socket.IO** room-based architecture for instant updates and implemented fault-tolerant token management using atomic **PostgreSQL** transactions to prevent race conditions.
- Built asynchronous job processing pipeline using **BullMQ** and **Redis** for **Cloudinary** image uploads reducing upload latency by **70%**, containerized with **Docker** and **Docker Compose** for local development, and deployed on **Render** cloud.

### MyTrackr | [Source Code](#)

Java, XML, Android, Firebase, Gemini SDK, ML Kit, Cloudinary

- Developed Android expense tracking app using **ML Kit** OCR and **Gemini AI** for automated receipt scanning, reducing manual data entry time by 80% and improving expense categorization accuracy.
- Implemented automated budget tracking with real-time expense aggregation, multilingual support, CSV/PDF export, and cloud-synced receipt storage, simplifying financial management for users.

### Study Adda | [Demo](#) | [Source Code](#)

React.js, MongoDB, Express.js, Node.js, Javascript

- Built student and instructor portal LMS using **React.js**, **Node.js**, **Express.js**, and **MongoDB** with **JWT** auth, **Razorpay** payments, video streaming, instructor analytics, and time-based discounts.
- Implemented course creation, enrollment tracking, progress monitoring, and **Cloudinary** media management.

## Leadership & Activities

### SKILLVARZ 1.0 Hackathon | *Semifinalist*

May 2025

- Built immersive 3D web experiences (**Food Drone** delivery simulation and **Amaya Café**) using **Three.js**, **React Three Fiber**, and **GSAP**, collaborating with a 5-member team.

### Google Developer Student Clubs (GDSC), Chitkara University

Dec 2022 – Feb 2024

- Event Management Team Member - Coordinated logistics for technical hackathons with 100+ participants.

## Technical Skills

**Languages:** Java, JavaScript, TypeScript, Python, Kotlin, C++, SQL, Bash/Zsh

**Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, React Native, Flutter, Spring Boot, Android SDK, Three.js, React Three Fiber, GSAP, Tanstack Query, Prisma

**Databases:** PostgreSQL, MongoDB, Firebase, Redis

**Tools & Technologies:** AWS (EC2, S3, ECR), Docker, Git, Jira, BullMQ, Socket.IO, Slack, Word, Excel

**Core Competencies:** RESTful API Design, Real-time Systems, Mobile Development, Full-Stack Development, Database Design & Optimization, Data Structures & Algorithms, 3D Web Graphics, Unit Testing (Junit & Jest)
