Manpreet Singh

Waterloo, ON | (416) 930-4426 | sing2470@mylaurier.ca | linkedin.com/in/manpreet- | github.com/Manpreet-Singh-Kamboj

Education

Wilfrid Laurier University	**Sep 2025 – Apr 2027**
Master of Applied Computing (Co-op)	GPA: 11 / 12
Chitkara University	**Jul 2021 – Aug 2025**
Bachelor of Engineering (Computer Science)	GPA: 9.23 / 10

Work Experience

CoreAI Technologies — **Jun 2025 – Dec 2025**
Software Developer — *Remote, India*
- Engineered a real-time Dashboard UI using **Next.js** and **TanStack Query** to visualize 15+ biomarkers with customizable pinning, target-setting, and interactive charts tracking recent entries.
- Developed Health Snapshot categorization system organizing biomarkers across blood, cardiovascular, and performance metrics with detailed information pages, simplifying health tracking workflows.
- Enhanced production Android Smart Lock application in **Kotlin** using **Seam SDK**, implementing 2 new features and resolving 15+ bugs across NFC door access, thermostat control, and guest-pin management.

SalesCode.ai — **Jun 2024 – Dec 2024**
Software Engineer Intern — *Gurugram, India*
- Developed geo-targeted advertisement banner system using **Spring Boot**, custom **Flutter** widgets, **MySQL**, and **AWS EC2** deployment, increasing click-through rates by 15% across 100K+ sales reps.
- Optimized **Flutter** app performance through widget refactoring and lazy loading patterns, reducing memory footprint from **89MB** to around **62MB**, improving overall app performance.
- Collaborated with 5 engineers in **Agile** sprints to deliver 5+ production **Flutter** features, implementing **unit tests** and incorporating code review feedback reducing post-release bugs.

Projects

Qure | *Frontend* | *Backend* — **Node.js, Express.js, React Native, PostgreSQL, Socket.IO, Redis, Docker**
- Developed full-stack clinic queue management system with **Node.js/TypeScript** backend, **React Native** mobile app, and role-based access supporting patient, staff, and administrator workflows with **JWT**-based authentication.
- Engineered real-time queue system using **Socket.IO** room-based architecture for instant updates and implemented fault-tolerant token management using atomic **PostgreSQL** transactions to prevent race conditions.
- Built asynchronous job processing pipeline using **BullMQ** and **Redis** for **Cloudinary** image uploads, containerized with **Docker** and **Docker Compose** for local development, and deployed to **Render** cloud platform.

MyTrackr | *Source Code* — **Java, XML, Android, Firebase, Gemini SDK, ML Kit, Cloudinary**
- Developed Android expense tracking app using **ML Kit** OCR and **Gemini AI** for automated receipt scanning, reducing manual data entry time by 80% and improving expense categorization accuracy.
- Implemented automated budget tracking with real-time expense aggregation, multilingual support, CSV/PDF export, and cloud-synced receipt storage, simplifying financial management for users.

Study Adda | *Demo* | *Source Code* — **React.js, MongoDB, Express.js, Node.js, Javascript**
- Built student and instructor portal LMS using **React.js**, **Node.js**, **Express.js**, and **MongoDB** with **JWT** auth, **Razorpay** payments, video streaming, instructor analytics, and time-based discounts.
- Implemented course creation, enrollment tracking, progress monitoring, and **Cloudinary** media management.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, Kotlin, C++, SQL, Bash/Zsh

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, React Native, Flutter, Spring Boot, Android SDK, Tanstack Query

Databases: PostgreSQL, MongoDB, Firebase, Redis

Tools & Technologies: AWS (EC2, S3, ECR), Docker, Git, Jira, Slack, Word, Excel

Core Competencies: RESTful API Design, Real-time Systems, Mobile Development, Microservices Architecture, Database Design, Data Structures & Algorithms, Object-Oriented Design, Unit Testing (Junit & Jest)
